Introduction About Myself

My name is Bishan Adiptha Ranamuka. I'm from Ragama. I did my O/L's and A/L's at Ananda College and now I'm a student in NSBM Green University completing a computer networking degree. I'd like to tell a little bit about my background,

I'm a creative and ambitious young student because I have a lot of ideas about my future. And I am a hard worker to achieve my future goals and become a better person.

As a student I'm very punctual and my teachers appreciate my school works and they motivate me as well. I always improve my skills and morals it become me as a better student, and I love to help my classmates to do their works and assignments.

I have passion for music, so I love to sing and play my guitar always. A lot of honors and certificates have been bagged by me in singing and guitar competitions. And, I have passion for watching movies and mostly I am watching sci-fi and romantic movies and tv series.

As my long-term goal, I would like to visit dubai and be a network engineer and live a better life.

✚ My School Life Experiences

My school life is the wonderful days in my life. I studied in Ananda college and I'm glad and proud to be a student of this school. I always miss my school life.

My school is in Colombo 10 and its Huge and beautiful. It has all the facilities students who study and sports, societies as well. It has divided as primary and the upper school which is call as secondary school.

In my primary school teachers teach us variety of subjects, and activities to make our school life better and easier and when I came to secondary school one becomes matured enough to understand the value of time. In that period, I learned truly and start working hard because I believe what you learn during the school life its truly impact the rest of our life.

We have a large playground where we all students play games and practice sports. And our school has two swimming pools, I was a swimmer in those days. There are many indoor and outdoor games in my school so sometimes me and my friends participate those games and we played them. It's not limited to studies and sports, there are lot of societies and committees such as music room is my favorite. I was an active member of Ananda collage Buddhist association too.

I learned many life skills in my school. Discipline, hard work, punctuality, and team working are some of them. And it will help me a lot in my future. The biggest reason behind the success of me is my school, and I'm very proud and Horner to say it. My school life has taught me many things as I said, and I love everything of my school life.

My Current University Life

In 2022 I entered to NSBM Green University for my higher educations as 22.1 batch. Going back to my first day I felt something couldn't even put words. I saw many new faces, but they all are my friends now. I do computer networking as my degree but still I'm in my first year first semester all computing students doing same subjects so we all are learning together in a lecture hall because of that we can easily meet all friends and make new friendships too.

In university we don't just learn, we have many extra-curricular things to do, such as we have a gym, pool, and playground so we all can use them to our physical healthiness and our leisure time. And our university has many societies too, so these things give us more and more experience and give more memorable things as a university. I think in a rest of life it will much more valuable to us.

We have already done few assignments as group works and individually as a result of that we got lot of experience and made new friendships with others, and I think we improved our leadership qualities and team working skills too.

But current situation in the country, university had to conduct physical and online lectures as hybrid mode because of it, the crowd of whole university has been decreased. Even in the midst of obstacles lecturers doing their best for teach us and we also doing our studies best.

About My Parents and Siblings

My family is a typical Sri Lankan family, and most loving family ever. There are my parents and my younger brother. I was the first-born child in my family.

Mother is a housewife her name is Udeni Shermila, she is nice and friendly person and she like to talk with other people. I also like to go out and talk with other friends, I think that quality is a gift I got from my mom.

My father is currently work as a building constructor, he has his own business, and his name is Chamara Iresh, he has opposite of my mom's qualities because he is a quite and clam person just want to share his free time with his loving wife and his sons.

My little brother who studies in grade 5 his name is Bilesa Himsara. I have a good relationship with my brother but sometimes there is a little quarrel but its normal and we try to resolve our problems quiet and together.

We are a middle-class family but as a family we are a happy living all together with

helping each other's and works hard and loving each other. Our family is an ideal and happy family.

- Health problems

Future Goals and plans

❖ Career

I want to graduate in NSBM and get a job as a Network Engineer.

❖ Financially

Buy my own house and vehicles like a car and a bike. And save money for my future.

❖ Personally

Want to live in Dubai and have a good life there.
Want to get a healthy and good-looking body.
Get a caring wife for my life.

❖ Family

One day I want to live in Dubai with my whole family and I want to give my parents happy and better life. And make my brother a good person and give him better studies in a best university.

And I have a Five-Year Life plan,

❖ My Bucket List

- Travel To Dubai and Switzerland.
- Want to Meet Josephine Langford (actress) one day.
- Get a husky.

Personal Branding

Everyone dreams, and dreams are valid. Each person would like to become what they ought to be. Lionel Messi is who a person success with his own ability and skills. He is a most popular football player in the world. He was the youngest player ever to play for FC Barcelona at the age of 16. He was born on 24th June 1987 in Rosario in Argentina. His family was poor and all of them played soccer except for his mom and sister. When he was age 1, he got a soccer ball and a soccer shirt as a gift. He was age 3 when he had played his first soccer match.

In young age Messi was diagnosed with hormone deficiency which restricted his growth, shorter than most of the kids at his age but Messi showed great talent which put him Infront of many organizations.

Messi had to travel to Barcelona where he had to do many difficult things. Rosario was a small town and Messi was always playing soccer around the streets of his neighborhood. Messi didn't like going to school he always tell mom that wouldn't comeback from school when his mom forced him. Messi always played with his ball he never left it he had a connection with it.

The reason I choose Messi is I have a passion to football and I always watching football matches, I personally like his appearance and his personality. To my opinion, he is the best football player ever. He has done things in soccer that no one has ever done in the history of the sport.

When he become a pro in football, he decided to come to play for his native country and he plays for FC Barcelona as they are the best team in the world today. They are smooth and have a great touch with the ball. And Messi played in 4 world cups, and by the record. He doesn't usually perform at his best. People say Messi is lazier when he is playing for his country and Messi says that he always gives hi 100% when he is out in the pitch.

Messi proved that everything is possible, and all dreams come true. We have great deal to learn from him like effort and commitment, as well as how he faced obstacles and how he faced in the face of insults and his patience.

I always try to apply the qualities of him to my life. There are lot of to learn from his life, so he is my current brand now.
